

Create WinForm Application by C#

20071515 Game Major
Sopomore Kim Doo Hyeok

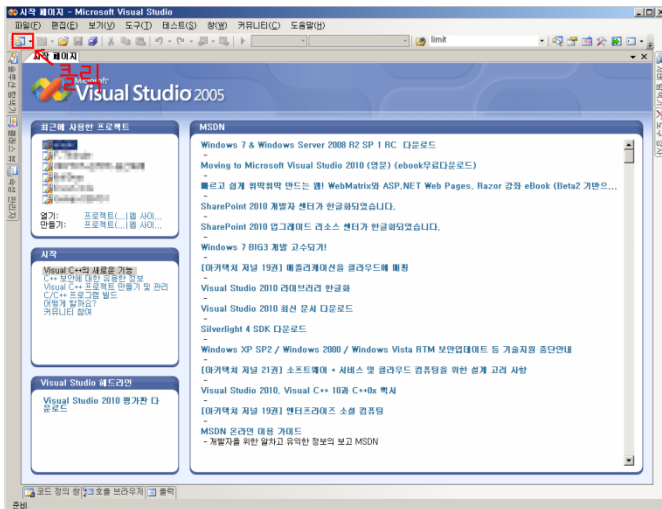

Learning Purpose

- You should learn C# WinForm Application programming from practice.

Running Visual Studio & Creating new project

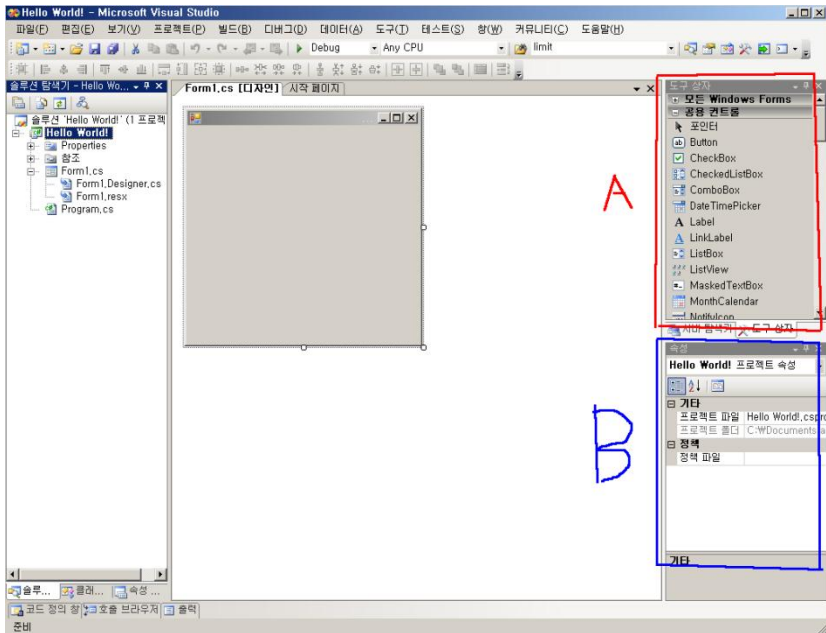

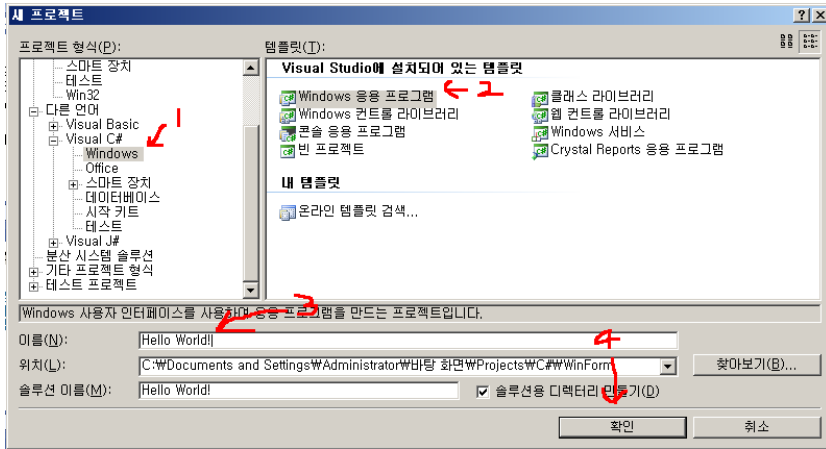

1) You should double click icon.

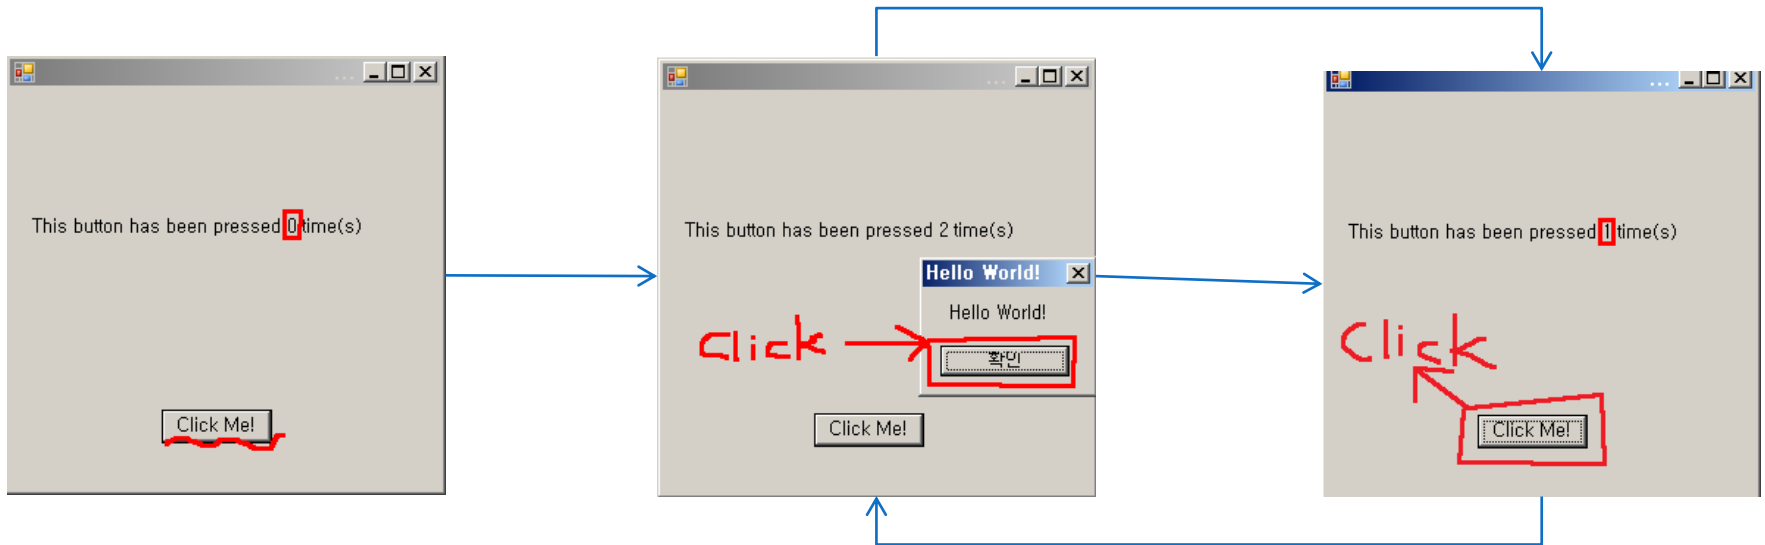

2) Create the new project.

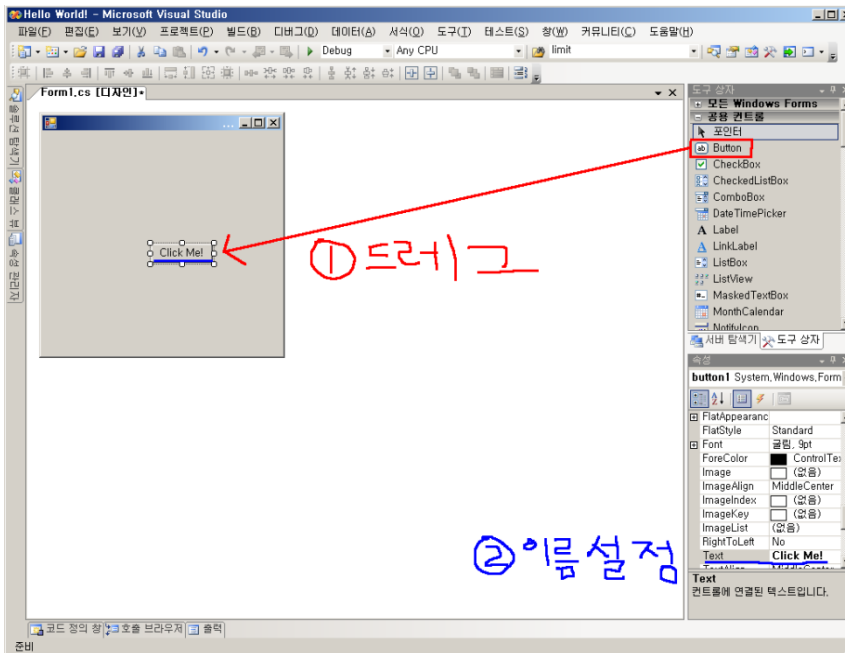

3) Make the WinForm Application's project.

Using WinForm Application

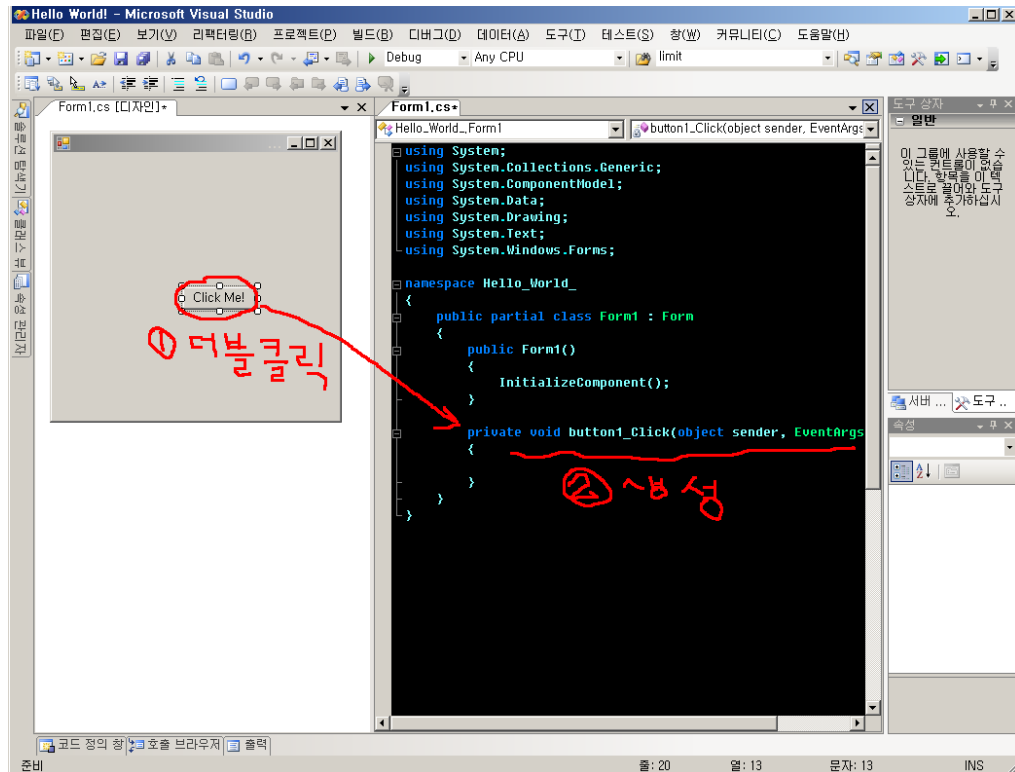

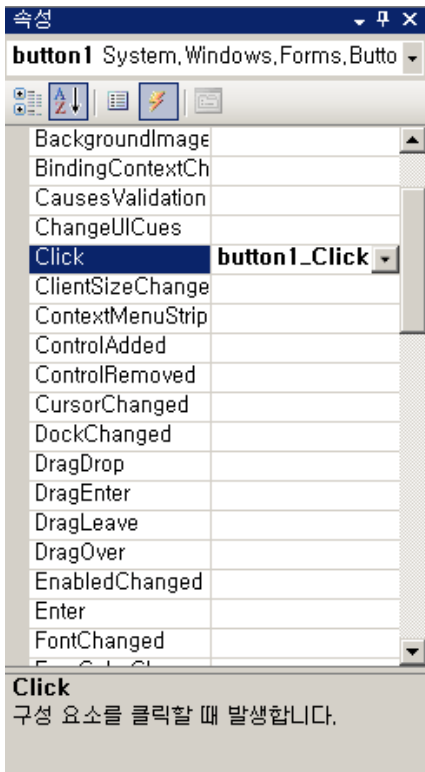

I will make this program form C#.

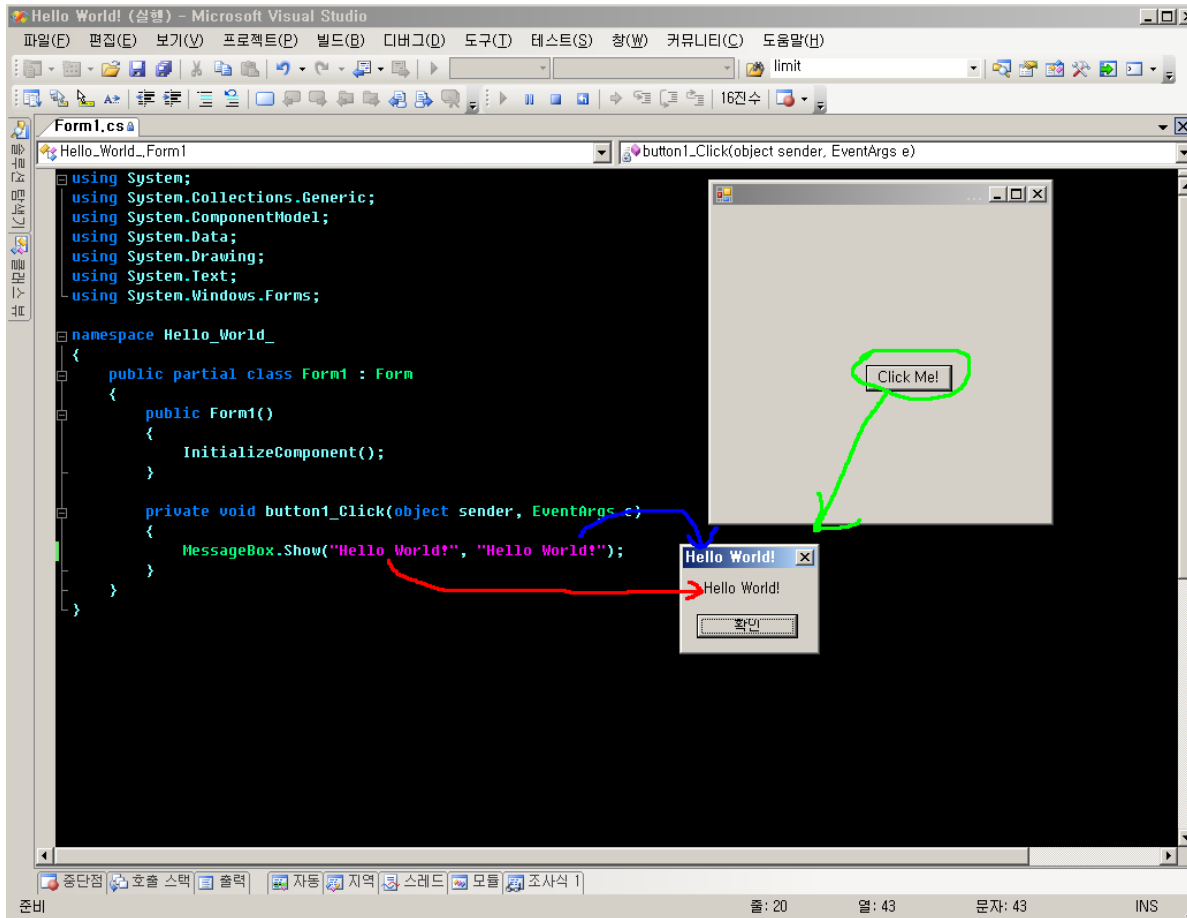

1) Make the button.

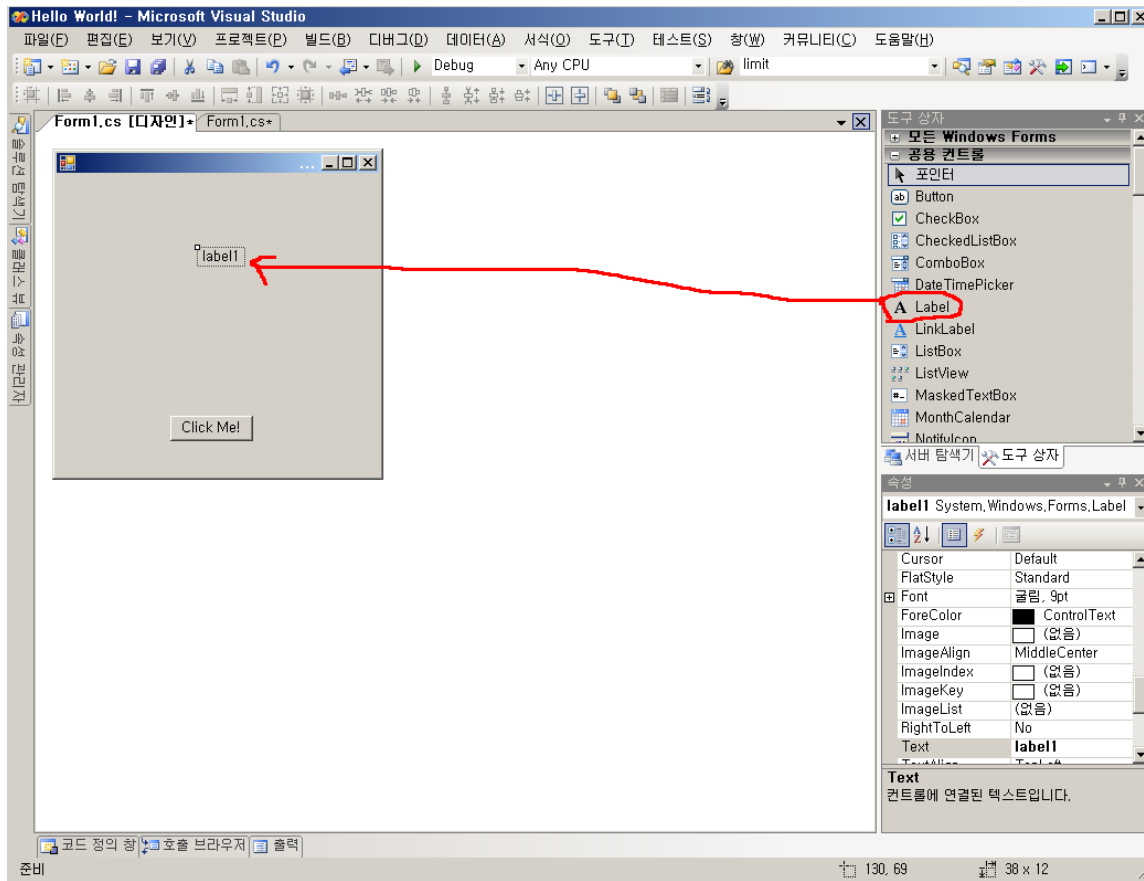

2) Set the button's information.

3) Make the button's method.

4) Code your source.

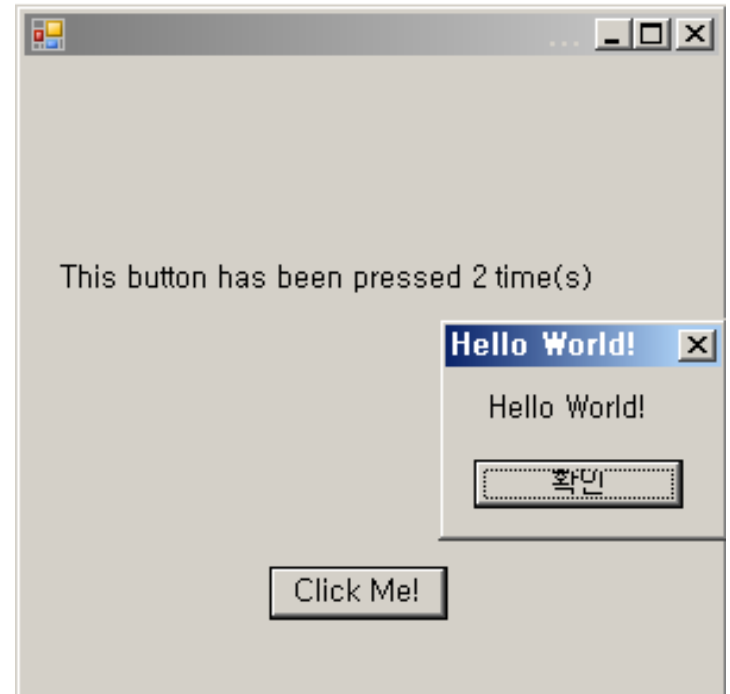

5) Make the label.

```
using System;
using System.Collections.Generic;
using System.ComponentModel;
using System.Data;
using System.Drawing;
using System.Text;
using System.Windows.Forms;

namespace Hello_World_
{
    public partial class Form1 : Form
    {
        int i = 0;
        public Form1()
        {
            InitializeComponent();
        }

        private void button1_Click(object sender, EventArgs e)
        {
            i++;
            MessageBox.Show("Hello World!", "Hello World!");
            label1.Text = "This button has been pressed " + i + " time(s)";
        }
    }
}
```

6) Code your source and run your project.
