1. The latest stable release of the Android mode can be installed through the Contribution Manager (CM) in the PDE. To open the CM, click the arrow in the mode selector in the menu bar, and choose "Add Mode...":

![Android Mode CM](https://android.processing.org/install.html)

2. Once the CM window shows up, select the Android Mode from the list, and then click the install button in the bottom of the window:

![Android Mode CM](https://android.processing.org/install.html)
3. Install Android Studio
   https://developer.android.com/studio

4. If you still want to use an SDK already downloaded to your computer, choose the "Locate SDK path manually" option and select the folder containing the SDK. However, this SDK should include Android 8.0 (API level 26) or higher.
